

FEAR FREE PUPPY SOCIALIZATION

BINGO!

Making Exposure Positive

Use these bingo squares for ideas on how to socialize your puppy. Socialization and exposure are active processes that are most crucial from three to sixteen weeks of age but should continue well beyond this age range. However, it's important to realize that socialization is not simply about exposure—it's about making it fun and positive from the start.

Think of these experiences as a behavioral investment, like placing pennies in a piggy bank. When done properly, your investment will result in a friendly and outgoing dog. Positive, proactive socialization involves liberal use of food treats (or, for some dogs, interactive play with a toy/attention/petting) to help form positive associations.
